

# Super flat floor improves overall project quality

Cont'd. from page 1

operations are important engines of economic activity in each of the communities where they are located and an essential element of construction activity wherever it occurs.

APRMCA's message to

government and to members of the legislature on all sides of the house is brief and clear. APRMCA asks that the government of Nova Scotia take three important steps:

- Give full consideration to, and respond to, the concerns of

the ready mixed concrete industry.

- Exclude the ready mix industry from the mandatory requirement for overtime, vacation pay, unpaid leave and excessive fines in the manner proposed.

• Delay the implementation of any changes to the Labour Code until at least April 1, 2003 to provide adequate time for the ready mix industry to consider reasonable alternatives to the legislated changes.

The Nova Scotia members

of the Atlantic Provinces Ready Mixed Concrete Association look forward to the government's response. This is a hard-working industry. Producer and associate members are excellent, strong corporate citizens who believe in Nova Scotia.

They have invested their careers and business futures here. They are always ready to work within existing industry and government frameworks to arrive at equitable solutions to issues. They have earned the privilege of fairer treatment in this case!

## APRMCA Provincial Breakdown
